Colloids and Surfaces, 25 (1987) 406–409
Elsevier Science Publishers B.V., Amsterdam — Printed in The Netherlands

Subject Index

Adhesion,
— of quartz particles on glass and properties of their suspensions in the presence of a cationic surfactant (Patzkó, Szántó) 173
Detachment of colloidal hydrous oxide-spheres from flat solids exposed to flow. 3. Forces of — (Hubbe) 311
Adsorption,
— of maltenes on sodium montmorillonite (Menon, Wasan) 387
— of phenol-formaldehyde resin onto cellulose (Johansson et al.) 341
A gas- — study of the influence of a flotation collector on the polar/nonpolar surface properties of barite (Biliński, Wójcik) 183
On the kinetics and reversibility of polymer — (Cosgrove, Fergie-Woods) 91
Adsorption kinetics,
— of cationic polyacrylamide onto cellulose fibers (Mahanta et al.) 101
Aerosil,
Peculiarities of the thermal expansion of water in the pores of — powder (Derjaguin et al.) 397
Aggregation,
Effects of surfactant — in soluble monolayers on dynamic surface properties (Lucassen-Reynders) 231
Antimony(V) silicate,
Forward and reverse ion-exchange kinetics for Na^+-H^+ and K^+-H^+ exchanges on crystalline — (Varshney et al.) 131
Barite,
A gas-adsorption study of the influence of a flotation collector on the polar/nonpolar surface properties of — (Biliński, Wójcik) 183
Biphase formation,
The relationship between clouding and aqueous — in polymer solutions (Ananthapadmanabhan, Goddard) 393
Cationic character,
The effect of surface charge on the flocculation of kaolin suspensions with cationic polyacrylamides of varying molar mass but similar — (Gill, Herrington) 297
Cationic surfactant,
Adhesion of quartz particles on glass and properties of their suspensions in the presence of a — (Patzkó, Szántó) 173
$CaWO_4$ solubility,
The surface chemical properties of scheelite ($CaWO_4$). I. The scheelite/water interface and — (Marinakis, Kelsall) 369
Cellulose,
Adsorption of phenol-formaldehyde resin onto — (Johansson et al.) 341
Cellulose fibers,
Adsorption kinetics of cationic polyacrylamide onto — (Mahanta et al.) 101
Cloud point,
The effect of electrolytes on the — of ionic-nonionic surfactant solutions (Marszall) 279
Clouding,
The relationship between — and aqueous biphase formation in polymer solutions (Ananthapadmanabhan, Goddard) 393
Colloid stability,
Electrical contributions to the effect of macromolecules on — (Lyklema, Fleer) 357
Compression strength,
The influence of adsorbed water on the — of titanium dioxide granules (Vervoorn) 145
Contact interaction,
— between fluid particles in liquid media. 1. Thermodynamic approach (Babak) 1
— between fluid particles in liquid media. 2. Numerical computation of line tension functions (Babak) 25
— between fluid particles in liquid media. 3. Generalized line tension theory (Babak) 205
Dodecylbetaine,
Micromulsions in zwitterionic surfactant systems: — (Kamenka et al.) 287
Dynamic surface properties,
Effects of surfactant aggregation in soluble monolayers on — (Lucassen-Reynders) 231
Electrolytes,
The effect of — on the cloud point of

ionic-nonionic surfactant solutions (Marszall) 279
Exchange properties,
— of silica gel functionalized with pyridinium ion (Gushikem, Moreira) 155
Fibrinogen,
Thermal desorption of — (Voegel et al.) 139
Flocculant dose control,
Fibre-optic on-line — in water treatment operations (Eisenlauer, Horn) 111
Flocculation,
The effect of surface charge on the — of kaolin suspensions with cationic polyacrylamides of varying molar mass but similar cationic character (Gill, Herrington) 297
Flotation collector,
A gas-adsorption study of the influence of a — on the polar/nonpolar surface properties of barite (Biliński, Wójcik) 183
Flow,
Detachment of colloidal hydrous oxide spheres from flat solids exposed to —. 3. Forces of adhesion (Hubbe) 311
Detachment of colloidal hydrous oxide spheres from flat solids exposed to —. 4. Effects of polyelectrolytes (Hubbe) 325
Fluid particles,
Contact interaction between — in liquid media. 1. Thermodynamic approach (Babak) 1
Contact interaction between — in liquid media. 2. Numerical computation of line tension functions (Babak) 25
Contact interaction between — in liquid media. 3. Generalized line tension theory (Babak) 205
Hydrous oxide spheres,
Detachment of colloidal — from flat solids exposed to flow. 3. Forces of adhesion (Hubbe) 311
Detachment of colloidal — from flat solids exposed to flow. 4. Effect of polyelectrolytes (Hubbe) 325
Ion-exchange kinetics,
Forward and reverse — for Na^+-H^+ and K^+-H^+ exchanges on crystalline antimony(V) silicate (Varshney et al.) 131
Kaolin,
The effect of surface charge on the flocculation of — suspensions with cationic polyacrylamides of varying molar mass but similar cationic character (Gill, Herrington) 297
Kinetics,
On the — and reversibility of polymer adsorption (Cosgrove, Fergie-Woods) 91
Laponite,
Sorption of rhodamine B by montmorillonite and — (Grauer et al.) 41
Line tension functions,
Contact interaction between fluid particles in liquid media. 2. Numerical computation of — (Babak) 25
Line tension theory,
Contact interaction between fluid particles in liquid media. 3. Generalized — (Babak) 205
Liquid media,
Contact interaction between fluid particles in —. 1. Thermodynamic approach (Babak) 1
Contact interaction between fluid particles in —. 2. Numerical computation of line tension functions (Babak) 25
Contact interction between fluid particles in —. 3. Generalized line tension theory (Babak) 205
Macromolecules,
Electrical contributions to the effect of — on colloid stability (Lyklema, Fleer) 357
Maltenes,
Adsorption of — on sodium montmorillonite (Menon, Wasan) 387
Mica surfaces,
Forces between poly-l-lysine of molecular weight range 4,000–75,000 adsorbed on — (Afshar-Rad et al.) 263
Microemulsions,
— in zwitterionic surfactant systems: dodecylbetaine (Kamenka et al.) 287
Montmorillonite,
Adsorption of maltenes on sodium — (Menon, Wasan) 387
Sorption of rhodamine B by — and laponite (Grauer et al.) 41
Newtonian black foam films
Rupture of — by α-particle irradiation: Hole mechanism (Penev et al.) 67
Oil/water interface,
Stress-relaxation experiments at the — (Van Hunsel, Joos) 251

α-Particle irradiation,
Rupture of Newtonian black foam films by —: Hole mechanism (Penev et al.) 67
Phenol-formaldehyde resin,
Adsorption of — onto cellulose (Johansson et al.) 341
Polyacrylamide,
Adsorption kinetics of cationic — onto cellulose fibers (Mahanta et al.) 101
Polyacrylamides,
The effect of surface charge on the flocculation of kaolin suspensions with cationic — of varying molar mass but similar cationic character (Gill, Herrington) 297
Polyelectrolytes,
Detachment of colloidal hydrous oxide spheres from flat solids exposed to flow. 4. Effects of — (Hubbe) 325
Poly-l-lysine,
Forces between — of molecular weight range 4,000–75,000 adsorbed on mica surfaces (Afshar-Rad et al.) 263
Polyoxyethylene-polyoxypropylene polyols,
Mixed monolayers of — or polypropylene glycols and stearic acid (Fu et al.) 167
Polypropylene glycols,
Mixed monolayers of polyoxyethylene-polyoxypropylene polyols or — and stearic acid (Fu et al.) 167
Polyvinyl alcohol,
The effect of solvent quality on the interaction between two layers of adsorbed — (PVA) (Götze, Sonntag) 77
Pyridinium ion,
Exchange properties of silica gel functionalized with — (Gushikem, Moreira) 155
Quartz,
Adhesion of — particles on glass and properties of their suspensions in the presence of a cationic surfactant (Patzkó, Szántó) 173
Rhodamine B,
Sorption of — by montmorillonite and laponite (Grauer et al.) 41
Scheelite,
The surface chemical properties of — ($CaWO_4$). I. The scheelite/water interface and $CaWO_4$ solubility (Marinakis, Kelsall) 369
Silica gel,
Exchange properties of — functionalized with pyridinium ion (Gushikem, Moreira) 155
Solids,
Detachment of colloidal hydrous oxide spheres from flat — exposed to flow. 3. Forces of adhesion (Hubbe) 311
Detachment of colloidal hydrous oxide spheres from flat — exposed to flow. 4. Effect of polyelectrolytes (Hubbe) 325
Solvent quality,
The effect of — on the interaction between two layers of adsorbed polyvinyl alcohol (PVA) (Götze, Sonntag) 77
Stearic acid,
Mixed monolayers of polyoxyethylene-polyoxypropylene polyols of polypropylene glycols and — (Fu et al.) 167
Stress-relaxation,
— experiments at the oil/water interface (Van Hunsel, Joos) 251
Surface charge,
The effect of — on the flocculation of kaolin suspensions with cationic polyacrylamides of varying molar mass but similar cationic character (Gill, Herrington) 297
Surface chemical properties,
The — of scheelite ($CaWO_4$). I. The scheelite/water interface and $CaWO_4$ solubility (Marinakis, Kelsall) 369
Thermal desorption spectrometry,
— of fibrinogen (Voegel et al.) 139
Thermal expansion,
Peculiarities of the — of water in the pores of Aerosil powder (Derjaguin et al.) 397
Thermodynamic approach,
Contact interaction between fluid particles in liquid media. 1. — (Babak) 1
Titanium dioxide,
The influence of adsorbed water on the compression strength of — granules (Vervoorn) 145
Water,
Peculiarities of the thermal expansion of — in the pores of Aereosil powder (Derjaguin et al.) 397
The influence of adsorbed — on the compression strength of titanium dioxide granules (Vervoorn) 145
Water activity,
Determination of — in water-in-oil

microemulsions (Galvin et al.) 195
Water-in-oil microemulsions,
Determination of water activity in — (Galvin et al.) 195
Water treatment operations,
Fibre-optic on-line flocculant dose control in — (Eisenlauer, Horn) 111
Zwitterionic surfactant systems,
Microemulsions in —: dodecylbetaine (Kamenka et al.) 287
